Test Case ID	Test scenario	Jira link	Priority	Pre-conditions	Test Data	Test Steps	Expected Result	Actual Result	Status	Comments	Bug
1	Reschedule appointment to an available slot	https://light-it.atlassian.net/browse/ST-1	High	Medical appointments platform is open. Patient has logged in. Patient has at least one appointment. Open 'Network' tab.	Username: lunar.osprey@qa-challenge.com Password: lUnA#Y3Rp_gquk!	1. Click on 'Reschedule' button 2. Select day and time. No match with another appointment. 3. Click confirm.	Appointment rescheduled successfully' message shown on the UI Date and time successfully modified. EP responds 200 Ok. Date and time retrived are correct Platform automatically refresh and shows the new appointments list	Appointment rescheduled successfully' message shown on the UI Date and time don't match UI and backend EP responds 200 OK. Date and time retrieved are not the new ones. Platform is not refreshed.	Failed	The system does not refresh the platform, so there is a mismatch between what the UI shows and the actual state. Besides, the date and time retrieved by the endpoint is the old one.	BUG-001, BUG-006
2	Reschedule to an unavailable slot	https://light-it.atlassian.net/browse/ST-1	High	Medical appointments platform is open. Patient has logged in. Patient has at least two appointments. Open 'Network' tab.	Username: lunar.osprey@qa-challenge.com Password: lUnA#Y3Rp_gquk!	1. Click on 'Reschedule' button 2. Select day and time. Match with another appointment. 3. Click confirm.	Sorry. This time slot is already booked' message shown on the UI Date and time are not modified EP responds 409 conflict status code	Appointment rescheduled successfully' message shown on the UI Date and time don't match UI and backend EP responds 200 OK status code. Platform is not refreshed	Failed	The systems allows to book two appointments in the same day and time.	BUG-005
3	Verify appointment identity after reschedule	https://light-it.atlassian.net/browse/ST-1	High	Medical appointments platform is open. Patient has logged in. Patient has at least two appointments. Open 'Network' tab.	Username: lunar.osprey@qa-challenge.com Password: lUnA#Y3Rp_gquk!	1. Click on 'Reschedule' button 2. Select day and time. No match with another appointment. 3. Click confirm.	Same appointment remains, no duplicate created	Same appointment remains, no duplicate created	Passed		N/A
4	Double-click on reschedule button	https://light-it.atlassian.net/browse/ST-1	Medium	Medical appointments platform is open. Patient has logged in. Patient has at least two appointments. Open 'Network' tab.	Username: lunar.osprey@qa-challenge.com Password: lUnA#Y3Rp_gquk!	1. Click on 'Reschedule' button 2. Select day and time. No match with another appointment. 3. Double click on confirm.	Network shows only one reschedulle endpoint call	The reschedulle endpoint is called twice	Failed	The UI doesn't block the button once it is pressed. This may generate further issues like double notification, double charges, sns/sqs inconsistencies, etc.	BUG-004
5	Verify system's date and time	https://light-it.atlassian.net/browse/ST-1	High	Medical appointments platform is open. Patient has logged in. Patient has at least two appointments. Open 'Network' tab.	Username: lunar.osprey@qa-challenge.com Password: lUnA#Y3Rp_gquk!	1. Click on 'Reschedule' button 2. Select day and time. No match with another appointment. 3. Click confirm. 4. Check the 'updated_at' field 5. Refresh the website 6. Check the 'updated_at' field in appointments endpoint response	The 'updated_at' field must have the actual date and time	The 'updated_at' field brings previous day with around 12 hours difference	Failed	The system's date and time is not correct	BUG-003
